How to read this

# What the site check found

High-priority problems are the most urgent. Warnings and notices are less severe, but they can still affect accessibility, search visibility, or site quality. The rows below group those findings into practical fixes.

## Performance

How quickly the page loads and responds to user interactions.

45/100

## Accessibility

How well the page passes automated accessibility checks.

73/100

## Best Practices

How well the page follows web security and development best practices.

89/100

## SEO

How well the page follows basic search engine optimization practices.

96/100

🕒 Not detected

### LLMs file

No llms.txt file was found at <https://typical.example/llms.txt>. This file can guide AI tools to useful public content.

🕒 Good shape

### Robots file

The check found robots.txt and a sitemap reference.

🕒 Not detected

### Visible FAQs

No visible FAQ sections were detected on the 25 public pages in the sitemap sample.

🕒 Not detected

### Structured data

Structured data was not detected on the public pages in the sitemap sample.

# Website audit

Captured August 29, 2026. The site check found 1 high-priority problems, 4 warnings, and 0 lower-priority notices across 25 affected pages.

• High Priority

## LLMs file not detected

Sitewide check ? Standard location

### What to fix

Add an llms.txt file linking AI crawlers to your key public pages.

*This is a sitewide check, not a page-specific crawl finding.*

•

## Robots file needs attention

Sitewide check ? Standard location

### What to fix

Review robots.txt to allow crawler access and point to the sitemap.

*This is a sitewide check, not a page-specific crawl finding.*

•

## Visible FAQs not detected

Priority public pages

### What to fix

Add FAQs to key pages with real buyer questions and clear answers.

•

## Structured data not detected

Priority public pages

### What to fix

Add valid JSON-LD describing your organization and key page content.

•

## Duplicate meta descriptions

26 affected pages

### What to fix

Write unique meta descriptions that explain each page's value and audience.

# Next steps for Apta Agency

Focus on the priorities from this week's report, then review their impact next week.

## LLMs file not detected

Add an llms.txt file linking AI crawlers to your key public pages.

☐ Review and resolve this finding

## Robots file needs attention

Review robots.txt to allow crawler access and point to the sitemap.

☐ Review and resolve this finding

## Visible FAQs not detected

Add FAQs to key pages with real buyer questions and clear answers.

☐ Review and resolve this finding

## Structured data not detected

Add valid JSON-LD describing your organization and key page content.

☐ Review and resolve this finding

## Duplicate meta descriptions

Write unique meta descriptions that explain each page's value and audience.

☐ Review and resolve this finding

# We' re here if you have any questions.

We can walk through the story, the evidence,  
or the cleanup list whenever useful.
